**Subject:** FW: EPA Decisions needed for Updating Places of Interest

Tim forgive but I couldn't recall if I sent this to you earlier. These are the decisions we need to address.

Thanks,

Alex

Alex,

There's a lot to read below. Let me know if anything isn't clear.

Andrew Stoeckle | VP, Information and Analysis | Eastern Research Group | o. 781.674.7261 C. Ex. 6 Personal Privacy (PP)

**Subject:** RE: EPA Decisions needed for Updating Places of Interest

Good Morning Andrew,

I am attempting to get clarification on how EPA would like to proceed relative to the items below. For my edification please help me to better understand the consequences of the following decisions. Please see my questions/comments below.

Thanks,

Alex

**Subject:** EPA Decisions needed for Updating Places of Interest

All,

There are a few items that need EPA input related to updating Places of Interest:

- 1) Consolidating records to locations where more than one program submits an entry for the same location is easy enough to process now. We are looking ahead to how to handle updates for these informally-defined places.

## Ex. 5 Deliberative Process (DP)

- 2) Once 1) is decided, someone should circle back to Cary McElhinney in Region 5 to let them know how their submission is being handled. ERG spoke to him once for background.

## Ex. 5 Deliberative Process (DP)

## Ex. 5 Deliberative Process (DP)

- 4) There are now two versions of the PFAS Qlik tools. One the planned to be public-facing National PFAS Data Explorer (currently viewable only by EPA). The other is accessible by States only with an mirror internal site for EPA. The not-for-public release variables (name and contact of submitters) and records with the “publicly releasable record”=Y will be published on the State/EPA “PFAS Analytic Tools” version.

## Ex. 5 Deliberative Process (DP)

FROM OSRTI

For future submittals, please remove Column T “Superfund Alternative Agreement” (Column T) so that format matches template for data call. OSRTI and FFRRO senior management included Column T in our submission as they are a bona fide category of sites where typically PRPs perform characterization and cleanup under an enforcement agreement without the sites being listed on the NPL. While we are not aware of PFAS detections at SAA sites, that fact doesn’t preclude that they won’t occur in the future. For the current submittal, OSRTI and FFRRO recommend not making this column public. For the reasons cited and unless directed otherwise, OSRTI and FFRRO will retain this column in future submittals.
